Education

- **University of North Carolina at Charlotte (UNCC)** — Charlotte, NC, USA
  Master of Science - Computer Science; GPA: 3.75/4.0 — *August 2024 - Present*
  Courses: *Visual Analytics, Software System Design and Implementation, Database Systems, Artificial Intelligence*

Skills Summary

Programming:	Python, C
Web Tech/Frameworks:	HTML, CSS, JavaScript, Django, Flask, Node.js, React.js
Databases:	PostgreSQL, MySQL, MongoDB, SQL
Tools:	Git, GitHub, Excel, PowerPoint, VS Code
Visualization:	Power BI, Tableau, Data Storytelling, Dashboard Design
Soft Skills:	Rapid Prototyping, End-user Focus, Team Collaboration, Adaptability

Experience

- **TTX Company** — Charlotte, NC, USA
  Business Analytics Intern – Fleet(Maintenance and Planning) — *June – Present*
  - Designed and deployed interactive Power BI dashboards analyzing hitch lubrication trends across thousands of railcars, enabling data-driven decisions on predictive maintenance scheduling.
  - Conducted A/B testing and statistical validation (Python, SQL, SciPy) on predictive models to measure the effectiveness of revised lubrication policies and optimize maintenance intervals.
  - Implemented continuous improvement workflows by documenting analytical approaches, mentoring peers on data visualization techniques, and adopting feedback loops for iterative model refinement.
  - Partnered with cross-functional teams (engineering, planning, operations) to align predictive insights with business objectives, ensuring actionable recommendations and high stakeholder adoption.
- **University of North Carolina at Charlotte** — Charlotte, NC, USA
  Research Assistant – Web Development — *Apr 2025 – Jul 2025*
  - Built an interactive logic game (HTML, CSS, JavaScript) to teach Boolean operations with engaging UI/UX.
  - Conducted user testing and iterated on gameplay mechanics based on student feedback.
  - Debugged logic flow and integrated visuals to improve comprehension and performance.
- **University of North Carolina at Charlotte** — Charlotte, NC, USA
  Graduate Teaching Assistant – Visual Analytics — *Jan 2025 – Apr 2025*
  - Mentored 50+ students on data storytelling and dashboard design with Tableau and Power BI.
  - Guided students on usability, visual presentation, and analytics during office hours.
  - Assisted with grading and refining course materials, improving project quality by [15%].
- **Arth Design Build Private Limited** — Hyderabad, TG, India
  Software Developer – Business Intelligence — *July 2023 – July 2024*
  - Automated 3D model data extraction from Revit to Power BI, improving decision workflows across design teams.
  - Built 5 JavaScript and Node.js plugins to streamline data sync between ACC, VCAD, and Power BI.
  - Developed an internal web platform using Django, SQL, HTML, CSS, and Bootstrap to manage analytics workflows.
  - Created 4 dynamic dashboards using SQL and Power BI, enabling 60+ stakeholders to access live project insights.
  - Used Git for version control while collaborating with developers and analysts across 4 cross-functional projects.

Projects

- **Appointment Management System**:
  - Developed a scalable doctor–patient scheduling web application with Django and SQL, integrating real-time notifications, secure booking workflows, and responsive UI to improve reliability and enhance overall patient experience.

  Technologies: Django, SQL, Bootstrap, HTML, CSS
- **Household Services Platform**:
  - Built a full-stack household services platform with the MERN stack, implementing a scalable booking system and REST APIs that improved request handling, user experience, and on-time feature delivery through Agile collaboration.

  Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js), RESTful APIs, JSON

Certifications

- AWS Academy Data Engineering **(AWS)**
- Project Management Fundamentals **(IBM)**
- Programming, DSA using Python **(NPTEL)**
- Introduction to Networks **(CISCO)**

Achievements and Service

- **Participant** at Axe Hacks 2025, built a React tool for real-time data use — *Charlotte, NC, USA*
- **Food Service Associate** at Chartwells, UNC Charlotte — *Charlotte, NC, USA*
- **Led** team at Yuvtarang AgriHack, built a crop advisory web app — *Vizag, AP, India*
